ART COOL™

ART THAT WORKS

INNOVATIVE COMFORT SOLUTIONS

LG Electronics, Air Conditioning Division 1000 Sylvan Avenue • Englewood Cliffs, NJ 07632 • www.lghvac.com

LG ART COOL™ — THE BRILLIANT MERGING OF FORM AND FUNCTION

Express your individual sense of style while cooling your living or working space with these attractive, duct-free air conditioning solutions from LG. Available in a variety of finishes—including a customizable model—the interior, wall-mounted unit can be subtle or splashy—it's up to you.

This innovative model allows you to display your favorite image in the customizable picture area. Any drawing, photo or other graphic can be placed in the LG Art Cool frame. Showcase artwork, a family portrait or vacation pictures—the choice is yours.

LG Picture Art Cool is available in 9,000 and 12,000 BTU air conditioners as well as heat pump models for all-season comfort. The white mat border included with each unit will accommodate a picture up to 20" x 20" with a 17" x 17" visible area.

ELEGANTLY EFFICIENT

NEW INVERTER TECHNOLOGY

LG Art Cool™ inverter models use a variable speed compressor which is quieter to operate and uses less energy than conventional air conditioners. When the selected temperature is reached, the inverter compressor operates at low speed to maintain that comfort level.

LG Art Cool inverter models have efficiency ratings of 16.0 – 19.7 SEER, making them among the most energy efficient in the industry. Plus, with capacities ranging from 9,000 – 24,000 BTUs, it's easy to find a unit to match any size room. Finally, when the weather turns cold, it's reassuring to know that LG Art Cool inverter models offer more heating power than conventional mini split heat pump systems.

What's more, LG Art Cool inverter models are as stylish as they are efficient. The interior unit features a cool, contemporary mirrored finish, and is also available in a variety of distinctive colors.

A GALLERY OF OPTIONS

LG's duct-free single zoned systems are designed to bring cool comfort to any room in a home, office, school or business. From vintage homes to urban loft settings, you're sure to find just the right look and system to enhance your space.

EASY CHOICES

Select the customizable LG Picture Art Cool and you'll be limited only by your imagination. Change the picture as often as you wish by simply lifting the front panel up and out, and sliding in the new artwork. LG's Art Cool is also available in a variety of colors and finishes.

Plus, both air conditioning and heat pump single, dual and tri-zone systems come in capacities ranging from 9,000 – 36,000 BTUs, so you'll never have to sacrifice comfort for good looks.

EASY TO USE

LG Art Cool products have all the features you look for in an air conditioner. Remote control operation, outstanding air purification, natural air flow and auto operation modes make these units the ideal choice for home or office.

EASY INSTALLATION

LG Art Cool and standard systems are highly flexible and can be retrofitted to most residential and commercial settings. There is no need for costly, time-consuming ductwork or window installation. Plus, the ultra quiet fan and motor make LG duct-free air conditioning a sound choice—even the outdoor condensing unit is quiet and neighbor friendly.

DISTINCTIVE FEATURES FOR DISCERNING CUSTOMERS

R-410A REFRIGERANT

Environmentally friendly refrigerant utilized in all LG Art Cool and Standard High Wall Split systems.

NEW INVERTER TECHNOLOGY

Features a quiet and efficient variable speed compressor.

PATENTED PLASMA AIR PURIFYING SYSTEM

Features a large, permanent filter and an electronic air purifier that captures microscopic contaminants like dust, mites, pollen and pet fur.

MULTIPLE MODES OF OPERATION

Cooling, fan and dehumidifying modes keep rooms perfectly comfortable.

CHAOS SWING

Random air flow reduces temperature stratification and hot and cold spots.

JET COOL

Quickly cools a room to 65°F by operating at high speed for 30 minutes.

AUTO OPERATION

Provides three levels of comfort with temperature and fan speeds that set automatically.

AUTO SLEEP MODE

Increases temperature setting by 2°F after 30 minutes and again in one hour. The interior unit shuts off when the timer setting is reached.

24 HOUR ON/OFF TIMER

Turns the unit on or off at preset times assuring you of a room that's the right temperature at the right time. You'll save on energy costs, too!

AUTO RESTART

Unit returns to programmed settings after a power outage.

ULTRA QUIET OPERATION

The outdoor compressor, fan and motor are super quiet and neighbor friendly.

REMOTE CONTROL

Each indoor unit comes with a convenient remote control with LED temperature readout.

DEFROST CONTROL (HEAT PUMP MODELS ONLY)

Shuts down the indoor fan to prevent cold air from circulating in the house, and removes frost from outdoor coil when the outdoor temperature is low (Heat Pump only).
