

DRAKE REFRIGERATION, INC. A COMPANY OVERVIEW

AIR-COOLED CHILLERS ■ WATER-COOLED CHILLERS ■ CHILLER GUARD™ ■ TANK AND PUMP PACKAGES

80,000 square foot manufacturing facility in Bensalem, PA

Dairy farm application

Drake's Mission

The mission of Drake Refrigeration, Inc., is to provide a high quality, dependable product line. Our focus is to maintain an extensive chiller stocking program for quick immediate needs.

Drake Refrigeration, Inc. has been manufacturing chillers since 1972 and offers a complete line from 1 to 120 horsepower, air-cooled and water-cooled chillers. Primary industries served include industrial, medical, and the food and beverage industry.

As a thriving chiller unit manufacturer, Drake continues to lead in manufacturing custom, designed chillers to meet a customer's particular needs when standard chillers won't work. By maintaining a cost effective, rugged, dependable product line with many custom features, our client base has grown to include many more industries and applications.

Process Applications

Commercial, Industrial & Residential

Air Conditioning • Oil Cooling • Injection Molding Cooling • Plating Process Cooling • Welding Machine Cooling • Computer Room Air Conditioning • Laser Cooling • Dry Cleaning Machine Cooling • Jacket Cooling • Water-Cooled Condenser Cooling • Photo Process Cooling

Medical & Pharmaceutical

M.R.I. Magnet Cooling • Operating Room Air Conditioning • P.E.T. Scan Cooling • X-Ray Developer Cooling • C.A.T. Scan Cooling • Lab Testing • Hypothermia Blankets

Food & Beverage

Bakery Cooling • Brewery Cooling • Winery Cooling • Drinking Water Fountain Cooling • Batch Cooling • Fruit and Vegetable Washing • Ice Machine Pre-Cooling

1972 Drake founded by Ronald S. Drake

1999 Introduced the semi-hermetic line up to 120HP

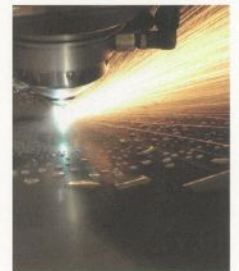

1997 Manufacturing moved from Florida to Bensalem, PA

2002 Replaced the hermetic compressor line with the scroll compressor

“Drake Chillers represent the most high-quality, durable, standard units on the market with cooling capacities ranging from 1 to 106 tons and are available for quick delivery.”

M.R.I. magnetic cooling

Water-cooled laser cutter

State-of-the-art evacuation, vacuum charging station

Extensive chiller stocking program for immediate delivery needs

Chiller Guard™

You can now access your chiller from the Internet, without the hassle of accessing a roof top or braving bad weather conditions.

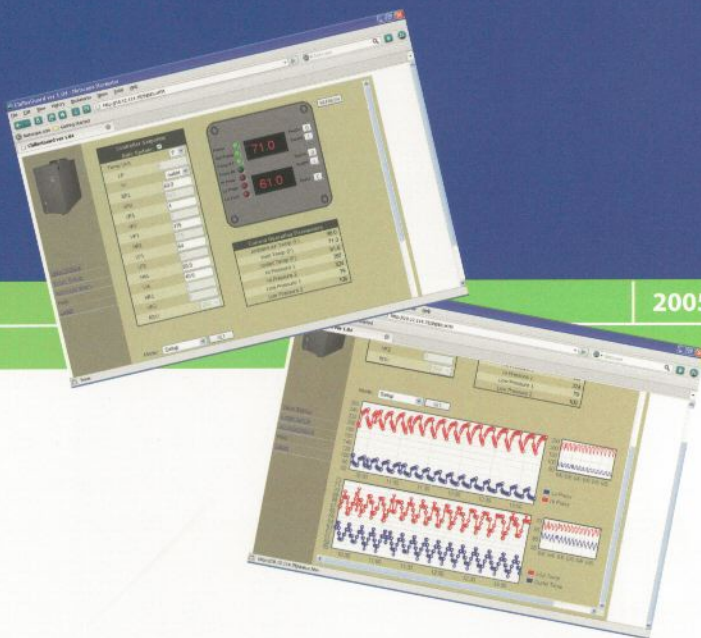

ChillerGuard™ monitors all alarm and warning set points and will e-mail up to 3 people in the event of a potential issue or system failure. Maintenance and troubleshooting are made easy with ChillerGuard™ protecting your equipment.

ChillerGuard™ offers peace of mind knowing your investment is well protected and gives you complete chiller control, as well as downloading and graphing features.

OEM Solutions

The equipment you make needs to be tough and reliable, and our components and systems are the cost-effective choice to get there. Our engineers work closely with OEMs to reduce development time and production costs.

You can count on Drake Refrigeration, Inc. for integrated systems that are performance-matched to meet your specific application requirements. This gives you the quality, productivity and value to meet your challenges...and the capacity to exceed them.

2005 Drake introduced the microprocessor controller

2009 Developed the ChillerGuard™ Internet Interface Device

“Along with a complete line of standard products, we also have the ability to custom build to each customer's particular needs.”

Scroll, air-cooled packaged and split-system chillers from 1 to 40 tons.

PACT 48 tank models.

Semi-hermetic water-cooled chiller from 1 to 106 tons.

Value-line chillers.

Chiller Product Line

Drake offers a complete line of packaged and split-system chillers and accessories for the residential and industrial chilled fluid markets. Drake also has the capability of manufacturing custom equipment to meet or exceed your specifications.

Packaged, Air-Cooled Chiller 1 to 60hp

Scroll compressor chiller series with or without stainless steel reservoir tank for residential and commercial air conditioning and process cooling.

Value Line, Air-Cooled Chiller 1 to 10hp

Packaged, air-cooled scroll compressor chiller series with or without stainless steel reservoir tank for residential and commercial air conditioning and process cooling.

Water-Cooled Chiller 1 to 60hp

Water-cooled scroll compressor chiller series with or without stainless steel reservoir tank for residential and commercial air conditioning and process cooling.

Packaged, Air-Cooled Chiller 1 to 120hp

Semi-hermetic compressor chiller series using a horizontal condenser coil with vertical air discharge.

Split-System, Air-Cooled Chiller 1 to 120hp

Semi-hermetic compressor indoor chiller series with shell and tube chiller barrel and remote outdoor horizontal condenser coil with vertical air discharge.

Water-Cooled Chiller 1 to 120hp

Semi-hermetic compressor chiller series with shell and tube chiller barrel and water-cooled condenser coil.

Tank and Pump Packages

30 to 600 gallon polyethylene and stainless steel tank and pump skids.

Fractionals

Fractionals consists of a 1/4hp, 1/3hp, 1/2hp, 3/4hp and 1hp R134a chiller line. Each chiller is packaged with a poly tank, casters, water pump, nonferrous water lines, microprocessor controlled, and a small footprint.

OEMs

Specifications include custom parts, paint schemes, footprints, etc.
