- *Does your dryer vent box require additional caulking and painting to look decent?* The DBX1000 & DBX1000M include matching snap-on trim rings. Your builder/customers will love the finished look the DBX products give the home laundry room.
- *Does your dryer vent box vent up or down and take in a gas line from above or below?* Only the DBX1000 & DBX1000M dryer vent boxes from Construction Solutions offers this kind of flexibility, which contractors need on the jobsite.

If you're installing the DBX1000 or DBX1000M from Construction Solutions, you are providing your customers with the most versatile and attractive dryer vent box available.

Ask your builder/customers what they prefer – then call us. We're here to help contractors do great work!
