

# Ventilating Dehumidifier DV070

**CLEAN COMFORT™**  
INDOOR AIR ESSENTIALS

The Clean Comfort™ DV070 dehumidifier is a high-efficiency, whole-house ventilating dehumidifier designed to fit in tight, low-clearance applications. The unit removes up to 70 pints of water per day and provides effective air filtration (MERV 11). The DV070 is designed to dehumidify up to 1800 sq. ft, which makes it ideal for a small home, condo or apartment application. The unit can be tied into a forced air duct system, dedicated ducting or used in a freestanding application. The DV070 can be installed in mechanical rooms, closets, attics, basements and crawlspaces.

The Clean Comfort DV070 dehumidifier has an innovative cabinet design that easily converts to either vertical or

horizontal airflow discharge allowing for easier installation in tight spaces where other dehumidifiers can't fit due to ducting issues and size constraints.
